A. INTRODUCTION OF FACULTY

General Introduction

It was established in 1997 within the scope of Akdeniz University Antalya School of Health Nursing Department and continued its education between 1997-2012. With the decision of the Council of Ministers published in the Official Gazette dated 25.11.2012, it became a "Faculty of Nursing" within Akdeniz University. Our Faculty, which is the fourth Faculty of Nursing established in Turkey, has been admitting students since the 2013-2014 academic year.

It is aimed to provide students with a strong background in nursing sciences in the Faculty, whose education period is 4 years. For this reason, science, practice, and education are carried out together in the Faculty. There are academicians (professors, associate professors, doctor lecturers, lecturers, research assistants) who will guide students in the field at every stage of academic development in the faculty. There is also an applied lecturer working by assignment and a nurse working in the laboratories.

Interactive education methods (group work, case study, demonstration, concept maps, article review portfolio, role play, case study, mentimeter, flipped,creative drama, etc.) are also used to ensure active participation of students in many lessons in the faculty where the classical education method is used. Clinical practices are carried out in clinics or the field by the objectives of the courses. The education and examination language of the faculty is Turkish.

The Faculty of Nursing carries out its teaching activities in a service building with a closed area of 7100 m2 on the campus. There are classrooms, lecture theater, library, psychosocial counseling room, graduate classrooms, computer, skill, and communication laboratories and a conference hall within the faculty.

Along with Nursing Undergraduate education, except the Department of Nursing Education Master's and doctoral programs are carried out by the faculty in all departments.

Our faculty has been accredited by the Nursing Education Accreditation Board to be valid from 04 April 2022 until 30 September 2025. The Quality Management System Certificate was renewed on April 14, 2022 and the certificate deadline is April 14, 2025.

Mission

In the direction of scientific approaches, in protecting, developing, and maintaining the health of the person, family, and society; To teach nurses who can use education,

practice, research, management, and leadership roles effectively and consider universal and cultural values.

Vision

To be a nationally and internationally recognized and preferred pioneering Faculty with its education, management, research, and practice philosophy.

Core Tasks

In the direction of scientific approaches, in protecting, developing, and maintaining the health of the person, family, and society; To teach nurses who can use education, practice, research, management, and leadership roles effectively and consider universal and cultural values

To be a nationally and internationally recognized and preferred pioneering Faculty with its education, management, research, and practice philosophy.

Quality Policy

Our faculty has been awarded the ISO 9001: 2009 Quality Management System (QMS) certification as a result of the certification examination made by TSE in 2016. Our Faculty aims to teach nurses who can perform health care practices in universal standards with the understanding of the Quality Management System and to increase the national and international recognition of our faculty with scientific and social activities.

Departments

- 1. Department of Fundamental Nursing
- 2. Department of Internal Medicine Nursing
- 3.Department of Surgical Nursing
- 4. Department of Obstetrics and Gynecology Nursing
- 5. Department of Child Health and Disease Nursing
- 6. Department of Management in Nursing
- 7.Department of Psychiatric Nursing
- 8.Department of Public Health Nursing
- 9.Department of Nursing Education

B. FACULTY EDUCATION PROGRAM

Admission Conditions

Students are admitted to the Faculty with the numerical score obtained in the Student Selection and Placement Exam. It has been decided that the academic year student quotas will be valid from the items in the terms and explanations guide of the higher education program, as items 38 and 87 are valid. These substances;

1. Students who will be enrolled in this program must wear the uniform required by the profession in practical courses (items 38).

2. To enroll in this program, a committee report must be obtained from a full-fledged official hospital and/or proposed by the university, certifying that there are no physical and mental disabilities that will prevent him from carrying out this profession during and after the education (items 87).

Graduation Conditions

The student who succeeds by taking all 240 ECTS courses in the Nursing Faculty Education Program graduates with the title of "nurse" and is entitled to receive a nursing diploma.

Program Objectives

• In the first three years following graduation, 80% of our students are employed as nurses in protective, therapeutic, and rehabilitative areas where they can offer nursing care in line with the holistic approach and nursing process for the health care needs of the healthy/sick person, family, and society.

• Take cares of professional ethical principles and values in nursing practices, use effective communication skills, evidence-based information, and informatics technologies as a professional member of the healthcare team.

• With the consciousness of lifelong learning, she/he continues her/his professional development by taking responsibility in the education, application, management, and research areas of nursing, 10% of them continue their graduate education within the first three years of graduation.

Program Outcomes

- 1. Has current theoretical and applied knowledge specific to the field of nursing.
- 2. Apply nursing care by using the knowledge and skills acquired based on evidence in the field of nursing.
- 3. Take cares of the universality of ethical principles, values, and human rights in the fields of education, practice, management, and research of nursing.
- 4. Acts following laws, regulations and legislation in professional practices.
- 5. Uses informatics and care technologies in nursing education, practice, research, and management.
- 6. The interdisciplinary and interdisciplinary team works in cooperation.
- 7. Communicates effectively with the person, family, and society.
- 8. Takes part in all kinds of research, projects, and activities that will contribute to personal and professional development.
- 9. Uses problem-solving, decision making, critical thinking, and leadership skills in professional practice. 10. Uses at least one foreign language at a level to reach scientific information and communicate effectively.
- 11. Adopts a lifelong learning approach in personal and professional development.

04.05 of the Nursing Faculty Nursing Department Board. It was accepted by its decision numbered (4/8) dated 2020. It was accepted by the decision of the Faculty of Nursing Faculty Board of Nursing, dated 04.05.2020, numbered 4 (6). It was accepted by the decision of the Akdeniz University Senate dated 22.06.2020 and numbered 31 (7)

Due to the Kahramanmaraş-centered earthquakes that took place in our country in the spring semester of the 2022-2023 Academic Year, YÖK decided to conduct the courses with distance education method in its decision dated 17.02.2023 and to complete the spring semester courses with both face-to-face and distance education methods as of 30.03.2023.

oSurgical Nursing course is given in the second semester of the second year to gain knowledge and application skills about the necessary nursing care in line with the understanding of basic health services, to meet the physical, psychological and social needs of the individual to regain, maintain and raise the health of the patient before, during and after surgery, the basic principles of surgery, diseases that require surgical intervention and nursing care.

oWomen's Health and Disease Nursing course is given in the first semester of the third grade to teach practically the skills of preventive, curative, and rehabilitative nursing approaches for the protection, development, and improvement of women's reproductive health based on women's health and diseases and deals with pre-pregnancy, pregnancy, birth, postpartum and climacteric period and common gynecological conditions which are a part of women's health.

oPediatric Nursing course is given in the second semester of the third grade with the holistic nursing approach to gain the knowledge, skills, and behaviors that can examine the growth and development characteristics of the child from birth to the end of adolescence according to systems.

oNursing Management course is given in the first semester of the third grade to provide students with the knowledge, skills, and attitudes regarding the management activities involved in planning, organizing, conducting, evaluating, and coordinating nursing services.

oTeaching in Nursing is given in the second semester of the third grade to develop the instructor role of the nurse by examining the basic concepts, principles, and teaching process of teaching.

oPsychiatric Mental Health Nursing course deals with the basics of mental health psychiatric nursing, community-based mental health psychiatric nursing, therapeutic approaches in psychiatric nursing, psychosocial nursing practices in non-psychiatric settings, and psychobiological disorders in line with the Mental Health Psychiatric Nursing Practice Standards. In this context, to teach students the ability to collect data about individuals, families, and groups through the systematic problem-solving method "Nursing Process", to diagnose, plan and implement mental health-enhancing, preventive, and curative nursing interventions, and to evaluate the results, Mental Health and Disease Nursing course is given in the first semester of the fourth year.

oPublic Health Nursing course is given in the first semester in the fourth year to learn how to protect and improve the physical, mental, and social health of the individual and the family, and to improve the health of the society by providing monitoring and rehabilitation of their treatment when necessary.

oNursing Intern Practice course is given in the second semester of the fourth year in order to transfer the student's theoretical knowledge to practice, to increase clinical skills, clinical decision-making, critical thinking and research skills, and to improve their ability to work independently by increasing their cognitive, affective and behavioral skills. Theoretical Practical occupational

courses are the courses given in the second semester of the fourth grade within the scope of intern practice and are carried out in line with the "Akdeniz University Nursing Faculty,

oNursing Department, Procedures and Principles of Intern Practice" where students are defined as intern nurse students.

Courses Other Than Occupational Courses

The courses given in addition to the occupational courses in our faculty contribute to our students having the necessary equipment and skills to perform the nursing profession as university graduates. These courses contribute to the training of nursing students with university graduate qualifications through learning the history of society and nursing, establishing interdisciplinary networking by acquiring features such as communication, entrepreneurship, providing care to individuals with different health problems, to be able to do research and use technology, loyalty to professional values, awareness of ethical principles and responsibilities, and the developing the philosophy of care, competence in foreign languages, learning the language of quality, and planning their future based on statistical data.

Courses other than theoretical, theoretical, and practical occupational courses in the curriculum of the Faculty of Nursing carried out by expert lecturers from Faculty of Medicine, Faculty of Health Sciences, Vocational School of Health Services, Faculty of

Letters, Akdeniz University Hospital, Turkish Language Department, School of Foreign Languages, Atatürk's Principles and Revolution History Research and Application Center the Entrepreneurship and Business Development Application Research Center, Statistics Unit, and Department of Informatics. Faculty are assigned in line with the course assignments that are renewed every semester. The National Nursing Core Education Program (HUÇEP) is sent to the lecturers assigned in the field of basic medicine by e-mail by our Vice Dean responsible for faculty-student affairs and student affairs staff before each academic year, and they are requested to review the course program and contents according to HUÇEP.

Other Required Courses Other Than Occupational Courses

- Anatomy (4 hours theoretical, 2 hours laboratory)
- Microbiology and Parasitology (2 hours theoretical)
- Physiology (4 hours theoretical)
- Pharmacology (2 hours theoretical)
- Biochemistry (2 hours theoretical)
- Pathology (2 hours theoretical)
- Introduction to Nutrition (2 hours theoretical)
- Psychology (2 hours theoretical)

- Health Sociology (2 hours theoretical)
- Biostatistics (2 hours theoretical)
- Occupational Health and Safety (2 hours theoretical)
- Anatomy lesson is given in the first semester of the first year to teach the normal structure, neighborhood, and functions of the organs related to the systems.
- Microbiology and Parasitology course is given to nursing students in the first semester of the first year to provide basic knowledge about microorganisms that cause infection and the diseases caused by them to help them practice their profession.
- Physiology lesson is given in the first semester of the first year to teach the functions of the human body at the cell, organ, and system level.
- Pharmacology course is given in the first semester of the second year to learn the pharmacokinetics of drugs, their mechanisms of action, drug interactions, drug use, contraindications, and side effects.
- Biochemistry course is given in the first semester of the second year to train nurses who know the basic concepts of biochemistry and can use this knowledge in their professional practice.
- Pathology course is given in the second semester of the second year to provide nursing students with general knowledge of pathology and to have a general culture about the place of pathology in diseases.
- Introduction to Nutrition lesson, healthy nutrition, illness and nutrition in special cases;
 The second grade is given in the first semester in order to use it in professional and private life.
- Psychology course is given in the second semester of the first year to inform students about the basic subjects of psychology, to contribute to their understanding of the basic concepts and theories of psychology and to learn about human behavior and development. - Health Sociology course is given in the second semester of the third grade to make the student understand and understand the relationship between health and socio-cultural structure and the social dimension of health as well as the medical dimension.
- Biostatistics is taught in the first semester of the third year to train students who have basic theoretical knowledge of biostatistics, can apply biostatistical methods, interpret results, plan, conduct, and conclude independent research in their field, and use statistical software.
- Occupational Health and Safety course is given in the first semester of the first year to develop the concept of occupational health and safety in nursing practices, to understand the health surveillance of employees and the surveillance of the work environment, and to identify dangers and risks.

Common Mandatory courses:

- Atatürk's Principles and History of the Turkish Revolution (2 hours theoretical)
- Turkish Language (2 hours theoretical)
- Foreign Language (2 hours theoretical)
- Use of Information Technologies (3 hours theoretical)

Common mandatory courses are given by the related departments at our university in our faculty. Common courses are the courses included in the sub-clause (I) of the first paragraph of Item 5 of the Law and the courses of the informatics department accepted by the Senate. According to the Associate Degree and Undergraduate Education and Examination Regulations of our university, students are required to take common courses to graduate.

- Ataturk's Principles and History of Revolution courses: Our students take both semesters in the first year to remember the period starting from the Ottoman Empire to today's Turkey and gain new knowledge. As university graduates, our students, who will contribute to the development of our society, are expected to know the history and events that affect their history and to shape their future with lessons learned from history.
- **Turkish Language course**: It is given in both semesters of the first year to comprehend the structure and basic grammar features of Turkish, to understand the texts read properly, to expand the vocabulary of the students.
- Foreign Language (English) courses: It is given in both semesters of the first year for our students studying in touristic geography to maintain effective communication. English lessons are given in both semesters of each class as Professional Foreign Language courses after the first year.
- **Use of Information Technologies course**: Computers are widely used in variousareas of life today, which is defined as the technology age. It is given to our students, who are members of the nursing profession, which is a professional health discipline, in the second semester of the first year to keep up with the times.

Elective Courses

In our faculty, other elective courses except for Entrepreneurship, Academic Turkish I are given by the faculty members of the nursing department.

- o Academic Turkish I is a course included in the first semester of the 2020-2021 Academic Year curriculum and can only be chosen by foreign students to raise awareness of academic language and gain the ability to use the Turkish language as a scientific language in the most effective way.
- o Entrepreneurship course: Networking, which is an undeniable fact for progress and development, can be created with entrepreneurial persons. For the nursing profession of our country to have an international network, young people with high entrepreneurial characteristics should be included in our profession. This course is given to our students in the first semester of the first year.
- o Developing of Caring Behaviors course: It is given in the first semester of the first year to gain nursing caring behaviors before starting clinical practice so that students can effectively fulfill the caring role, which is one of the most valuable values of the profession. o Nursing Philosophy course: It is given in the first semester of the first year for students to acquire the basic philosophy and values of nursing that will contribute to the formation of their professional values, and to have the understanding of giving sensitive and knowledgebased care in line with these values and philosophy while

carrying out their professional studies o Health Assessment course: It is given in the second semester of the first year for students to understand the importance of health assessment in nursing care and to gain skills in methods that can be used to evaluate health.

- o Sexual Health course: It aims to enable our students to acquire the necessary information about sexuality and to acquire the attitude and skill to make the right decisions on issues concerning sexual health.
- o History of Nursing and Deontology course: It is given in the first semester of the second year to teach the students the philosophy and aims of nursing as a profession, to teach the basic and deontological principles and professional ethics of nursing, to enable them to discuss nursing education, practice and the problems encountered, to teach the role of the professional nurse in the healthcare team, to teach the nurses' legal responsibilities, to inform them about national and international nursing organizations, and to gain the ability to use the knowledge gained in education to solve the problems encountered.
- o Health Care Ethics course: It is given in the first semester of the second grade for students to analyze important and controversial issues in the ethics of care, to make inferences about possible solutions by analyzing ethical problems, to make inferences about possible solutions, to make systematic decisions about the best solution for a specific situation.
- o Communication Skills Development course: It is given in the second semester of the second year for the student to get to know himself, gain communication skills, develop assertiveness and use them in his own life, as well as recognize various communication problems that may arise in human relations, and gain the ability to solve these problems.
 o Professional Communication course: It is based on the course of the interpersonal relations of the student, and is given in the second semester of the second grade to teach the student to recognize various communication problems that may arise in the relations between the individual, family, team members and team members, and to plan and apply

situation-specific interventions to solve these problems.

- o Infectious Diseases and Care in Infectious Diseases courses: These are given in the second term of the second year for the prevention and treatment of communicable diseases and the protection of public health.
- o Trauma Nursing course: It is given to our students in the first semester of the third grade so that they can care for traumatized individuals.

o Emergency Care Nursing course: It is given to our students in the first of the third grade to give the student the ability to apply the necessary nursing care to patients of all ages, individuals and their families who need urgent care by using the nursing process in order to acquire information about concepts and principles related to emergency care, to know the emergency care equipment and to put into practice It is given during the period.

- o Family Health Nursing course: It is given in the first term of the third year to protect the family, which is the smallest society, and to contribute to the maintenance of health.
- o Neonatal Nursing course: It is given in the first semester of the third year to provide information on the evaluation of healthy and high-risk newborns and nursing care.
- o Volunteering studies course: It is given in the first semester of the third grade to strengthen the ties between the university and the society by using the knowledge and skills that students have acquired throughout their education life and to raise awareness about various issues and problems in the society.
- o Community Support Projects course: It is given in the first semester of the third grade to identify the problems in the society, gain awareness of social responsibility and develop projects with social awareness and sensitivity.
- o Nursing Informatics course: It is given to help gain knowledge about e-health services, which have gained momentum with the development of technology.
- o Quality Management course: It is given in the second semester of the third year to teach the quality processes in nursing management.

| C03 | Defines the modern occupational health and safety approach |
|---------|--|
| C04 | States the application principles of occupational health and safety |
| C05 | Knows the occupational and worker health policies, can discuss the service of worker health in Turkey |
| C06 | Knows the legislation on occupational and worker health |
| C07 | Know occupational health services in the working environment |
| C08 | Defines the concept of the work environment and worker health surveillance |
| C09 | Knows the applications required for the protection and improvement of employee health |
| C10 | Evaluates the physical, chemical, and biological risks in the work environment |
| C11 | Knows the risk groups in the working environment and the protective measures to be taken against these groups |
| C12 | Knows the definitions and importance of occupational accidents and diseases |
| C13 | Know occupational accident and disease statistics in Turkey and the world |
| C14 | Lists occupational diseases classification, explain protection from occupational diseases. |
| C15 | Knows the occupational risks of healthcare professionals, develops a culture of protection against these risks |
| C16 | Knows the vaccination program for healthcare professionals |
| | |
| | |
| Program | Learning Outcomes |

| Course | Learning Outcomes |
|------------|---|
| No | Learning Outcomes |
| <u>C01</u> | The aim of this course is to help students acquire sound foreign language habits which they will need during their university education and their work at health institutio |
| C02 | The student understands and uses relevant terminology |
| C03 | The student learns the expressions and vocabulary in official correspondance. |
| C04 | The student uses English in his/her career. |
| C05 C06 | The student understands the main parts of occupational articles. |
| C08 C07 | The student understands and uses the relevant grammatical structures. The student has an A2.1 level of Professional English |
| Progra | m Learning Outcomes |
| No | Learning Outcome |
| P09 | Use problem solving, decision making, critical thinking and leadership skills in their professional practices. |
| P08 | Participate in all kinds of researches, projects and activities that will contribute to their individual and professional development. |
| P10 | Use at least one foreign language to reach scientific knowledge and communicate effectively. |
| P01 | Have the current theoretical and practical knowledge in the field of nursing. |
| P11 | Accept lifelong learning approach in personal and professional development. |
| P07 | Communicate effectively with individual, family and society. |
| P02 | Apply nursing care by using the knowledge and skills based on evidence in the field of nursing. |
| P06 | Work in collaboration of disciplinary and interdisciplinary teams. |
| P04 | Act in accordance with laws, regulations and legislation in professional practice. |
| P05 | Use informatics and care technologies in nursing education, practice, research and management. |

P03 Protect ethical principles, the universal of values and human rights in the fields of education, practice, management and research of nursing care.

Mode of Delivery: Face to Face Language of Instruction: Turkish Level of Course Unit: Bachelor's Degree Work Placement(s): No Department / Program: Nursing Type of Course Unit: Elective

Objectives of the Course: This course aims to introduce students to the basic computer and health informatics terminology and developments in computer technology, e-health, telehealth, education and research. The aim of this course is to provide the students with the necessary knowledge and skills to use the knowledge effectively in the information age, informing them about the data standards, data integrity, general health and nursing information standards and electronic health record, health information systems, security and privacy. Content of the Course:

Nomenclature Systems E-health, telehealth, home care systems Security and Ethics in Health Informatics The Future of Health and Nursing Informatics and Discussion Prerequisites and co-requisities:

Course Coordinator:

Name of Lecturers: Instructor Dr. Deniz Özel

Assistants:
