

## SUSTAINABILITY / CLIMATE ACTION POLICY

Akdeniz University is committed to promoting sustainability and climate action across its operations and academic activities. Our policy focuses on several key areas:

**Environmental Responsibility:** We aim to minimize our environmental footprint by reducing energy consumption, promoting renewable energy sources, and implementing efficient waste management practices.

**Education and Research:** We integrate sustainability principles into our curriculum and research activities. This includes studying climate change impacts, sustainable development practices, and fostering innovation in environmental technologies.

**Community Engagement:** We actively engage with our local community to raise awareness about environmental issues and promote sustainable practices through outreach programs and partnerships.

**Infrastructure and Operations:** We strive to make our campus environmentally friendly by adopting green building standards, optimizing water and resource use, and enhancing biodiversity on campus grounds.

**Collaboration and Leadership:** We collaborate with industry, government, and academic partners to advance sustainable initiatives and advocate for policies that support climate action regionally and globally.

Through these efforts, Akdeniz University aims to lead by example in sustainability and contribute positively to addressing climate challenges for current and future generations.

Revised by the decision of the Akdeniz University Senate on March 27, 2025.
